Modified Transport for West Australians living with physical disabilities

Make a difference WA Charity Project 2011

Make a Difference WA was delighted to give their support to young Jason McLean, a talented young cricketer who suffered a tragic accident at the beach that left him a quadriplegic and took away his ability to live an independent life.

Following his rehabilitation, Jason completed a degree in Finance and Accounting at ECU and works part-time for Disability Services in the Finance Department. Jason's family has struggled with an old unreliable, uncomfortable converted van for a number of years to transport Jason around during his many visits for rehab, hospital and general daily life. Make a Difference WA was more than happy to fund a new modified vehicle for Jason and his family giving them an improved quality of life and more importantly a reliable vehicle.

Assistance Dogs for West Australians living with physical disabilities

Make a Difference WA thanks you for joining us in partnership with Assistance Dogs Australia to make a difference for these very special people who would be

forever grateful to receive one of these dogs and long term add greatly to their quality of life.

Assistance Dogs Australia - What we do

Assistance Dogs Australia (ADA) provides daily assistance to hundreds of Australians through the use of canine support. ADA is a non-profit organisation that trains Labradors and Golden Retrievers to help enhance the quality of life and improve the level of independence for people with physical disabilities. As a result of the ADA program these highly trained dogs allow recipients to have a greater mobility, gain confidence and have a higher self-esteem.

Thankyou for Making A Difference
